With 12.1 megapixels, you can create stunning, photo-quality prints up to A3 size, or crop your images and still come away with high resolution shots.
- **3.0¹ Clear Photo LCD™ display (230k pixels)**
Generous 3.0¹ (230K pixels) Clear Photo LCD™ display features sharp, natural color that makes it easy to compose shots, read menus, and view photos, even in bright sunlight.
- **Intelligent (iAuto) Auto Mode**
Unlike traditional auto mode, Intelligent Auto (iAuto) mode thinks for you, recognizing scenes, lighting conditions, faces, and adjusts settings resulting clear images, faces with natural skin tone and less blur. Take advantage of all the technology without leaving Auto mode. Take a picture from a kid on the playground, to landscape shots, to a beautiful flower or an indoor birthday party. All clear images without leaving auto mode.
- **Intelligent Scene Recognition (iSCN) Mode**
Intelligent Scene Recognition (iSCN) Mode automatically detects seven different types of scenes and, within just 1/30th of a second, selects the appropriate camera settings: Backlight, Backlight Portrait, Twilight, Twilight Portrait, Portrait, Landscape and Macro
- **Steady Shot™ Image Stabilization**
SteadyShot™ image stabilization compensates for camera shake and helps prevent blur through use of digital processing technologies.
- **High Sensitivity Mode (ISO 3200)**
High ISO allows for faster shutter speed, so you can take photos indoors or in low light without the need for a flash. In addition to High Sensitivity Mode (ISO), you can select up to seven ISO settings (Auto, 100, 200, 400, 800, 1600, 3200) when shooting in Program Auto Mode to adjust sensitivity to your shooting conditions.
- **Face Detection technology**
Face Detection technology detects up to eight individual faces and adjusts focus, exposure, and flash to help deliver crisp, properly lit images of family and friends.
- **Smile Shutter™ technology**
Smile Shutter™ technology captures a smile the moment it happens. Simply press the Smile Shutter™ button and the camera does the rest. Intelligent Scene Recognition can now be used together with Smile Shutter™ mode when the Intelligent Auto mode is on. This means that beautiful smiles can be captured with settings optimized for the particular scene, even in difficult conditions such as twilight and backlighting.
- **Scene Modes**
The DSC-S2100 features 8 convenient scene modes: High Sensitivity / Twilight / Twilight Portrait / Portrait / Landscape / Beach / Snow / Gourmet
